

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS AIR FORCE CENTER FOR ENVIRONMENTAL EXCELLENCE
BROOKS AIR FORCE BASE TEXAS

27 APR 2001

MEMORANDUM FOR DISTRIBUTION

FROM: HQ AFCEE/CC
3207 North Road
Brooks AFB TX 78235-5363

SUBJECT: AFCEE Technology Transfer Workshop, 29-31 Jan 01

I hope you enjoyed the Air Force Center for Environmental Excellence (AFCEE) Technology Transfer Workshop and found it informative and useful. We were pleased to have the opportunity to develop and host the workshop for you, our stakeholders.

AFCEE is excited to be able to offer you this great resource CD. Not only does it contain all the presentations you heard during the workshop, but also provides supportive material on each subject the AFCEE has produced over the years. You will also find information regarding our technology initiatives in various fields, links to informative websites, and a feedback form. Please use this form to let us know what you thought of the workshop, or if you have any questions concerning the use of these technologies at your base. I encourage you to use the resources on this CD in developing your cleanup programs using the most effective, demonstrated technologies available.

The Technology Transfer Division (AFCEE/ERT) worked hard to produce this world-class workshop, which was attended by over 170 environmental professionals. AFCEE attempts to provide an unbiased and balanced assessment of the rapidly growing field of environmental technology. AFCEE/ERT will continue to identify and validate environmental technologies while managing demonstration projects and maintaining technical libraries for our customers. As a valued customer we hope you will turn to AFCEE/ERT or other AFCEE divisions when you have environmental technology issues and/or concerns.

Please feel free to contact Sylvia Ortega at (210) 536-4331 or DSN 240-4331 if you have any questions regarding the material on this CD.

GARY M. ERICKSON, P.E.
Director
